"Through the RSI programme we met Adam Lightbody of Urban Tonic. We immediately identified that we had discovered an exceptionally talented entrepreneur who had developed a range of high quality men's grooming products. During our discussions and planning sessions with Adam, we identified a few challenges that could impact on Urban Tonic's potential. We found the solution to these challenges through the AIP."

dotRetailer.com provide a fully responsive eCommerce platform to allow retailers of all sizes to easily manage their online presence. With a focus on drag & drop merchandising and mobile friendly payments the platform has been described by a leading agency as "one of the best I've seen".

Established in 1998 we have worked with some large online brands & retailers, such as Superdry & Duffs footwear as well as local retailers, creating custom built eCommerce websites, these saw multi million pounds of sales transacting through our technology.

In 2013 we decided to become a "mobile eCommerce" platform, meaning that our websites work correctly across all devices, such as smart phone, ipads and desktops. WHAT IS A BUSINESS PLAN?

**LEARN THE IMPORTANCE OF YOUR *PRIMARY RESEARCH*,
IT'S NOT AS COMPLICATED AS YOU THINK.**

A business plan is like a road map – it will tell you where you are, where you want to go and how you're going to get there! Every business should have one. Read our guide to the importance of a business plan.

Creating a Business Plan

A business plan describes the business' objectives, its strategies, the market it is in and its financial forecasts.

Going through the process of writing the plan should focus your mind on everything from where the business will be based to where you are going to find your first customer.

It is also a blueprint for the future development of the business that potential investors and banks will want to read before they lend to you.

Your business plan should include:

- ✓ an overall summary
- ✓ a description of the business
- ✓ a marketing and sales strategy - who you think your customers are going to be and how you are going to reach them through advertising and social media
- ✓ information on your staff and roles required
- ✓ information on your operations, including your business premises (if required), your IT and management information systems
- ✓ financial forecasts - how much you need to start the business and where you are going to get this money from, how much you think the business is going to make and what salary you plan to take, etc

Ards Business Centre is here to help you with your business plan. If your business idea is at the early stages, contact us today to set up an appointment with one of our business advisors. We will take you through step by step to make your dream a reality.

On your first meeting you will be able to discuss your ideas and understand how important it is to carry out your primary research and marketing plan. This exercise allows you to identify your competitors, set out clear objectives, consider pricing and lists the actions you will take to achieve them.

A marketing plan includes factors such as, deciding which customers to target and how to reach them, how to win their business and keep them happy afterwards, as well as continually reviewing and improving everything you do to stay ahead of the competition.

Remember that marketing in itself will not guarantee sales, but a well-researched and coherent marketing plan will give you a much better chance of building long-term, profitable relationships.

*A dream written down with a date becomes a **goal**.*

*A goal broken down into steps becomes a **plan**.*

*A plan backed by **action** makes your dreams come true.*
